Profile (About)

A multimedia journalist, artist and graphic designer with a passion for abstract concepts and combining various media into projects. I specialize in Illustrator (Vectors), Photoshop (bitmap), and taking other media, such as photography, into graphic design concepts. I also use the iPad with stylus for added assets.

I also combine media across my iCloud account, thus I may start a project as a hand drawn image or something created on my iPad via a stylus, then place it into Illustrator, trace the image and add unique backgrounds.

Experience
